S. RAM KUMAR

Senior Technical Architect · PHP / Laravel / Symfony

+91 9944336491 | enggram@gmail.com | linkedin.com/in/enggram | enggram.github.io | Chennai, India

PROFESSIONAL SUMMARY

Results-driven Technical Lead and Architect with **15+ years** of experience designing, developing and delivering scalable web applications using PHP 8.x, Laravel (up to v11) and Symfony. Skilled in leading cross-functional teams, architecting RESTful APIs, integrating third-party services and optimising backend performance. Proven track record in VAT and compliance-based systems, product maintenance, and implementing secure, high-performance solutions aligned with business objectives. Works AI-assisted and spec-driven development into day-to-day delivery, cutting development time on recent feature work by approximately 50%.

CORE COMPETENCIES

Backend	PHP 5.x–8.x, Laravel 6–11, Symfony 1.4–5.x, CodeIgniter, Shell
APIs & Architecture	RESTful API development, Microservices, Eloquent ORM, Doctrine ORM, System design
Databases	MySQL, PostgreSQL, MSSQL, SQL optimisation, Redis, Solr Search
Front End	HTML, CSS, JavaScript, jQuery, Ajax, Bootstrap, AngularJS, Vue.js
Cloud & DevOps	AWS (EC2, S3, Load Balancer), Docker, Linux, CI/CD, Git, SVN, Bitbucket
Integrations	Payment gateways, Twilio, SendGrid, Mailchimp, SSO
Practice	PHPUnit, Jira, Agile/Scrum, Team leadership, Mentoring, Code review, Estimation
AI-Assisted Dev	AWS Kiro, GitHub Copilot, PhpStorm AI Assistant, spec-driven development, vibe coding

AI-ASSISTED DEVELOPMENT

- Use **AWS Kiro**, **GitHub Copilot** and **PhpStorm's built-in AI Assistant** daily as part of the standard delivery workflow.
- Apply **spec-driven development** for requirement-backed feature work — authoring the spec, reviewing the plan, then driving implementation from it — and **vibe coding** for prototypes, spikes and exploratory work.
- Reduced development time by **approximately 50%** on recent feature work, with gains in spec-to-code turnaround, refactoring confidence and documentation currency, while retaining ownership of architecture review, scope decisions and production releases.

PROFESSIONAL EXPERIENCE

Senior PHP Laravel Developer
May 2021 – Present

Fintua — Bangalore, India

Vault & Recover — VAT return platform for preparing, validating and filing VAT returns

- Lead a team of 2 backend developers, 1 QA and 1 frontend developer across the product lifecycle.
- Build and maintain the Vault and Recover VAT return products using Laravel 11 and PHP 8.2.
- Design and implement RESTful APIs and integrate Document Tracker, Data Uploader and SSO.
- Own system scalability, compliance validation rules and query performance for VAT return reporting.

Senior Technical Architect
Jul 2017 – Apr 2021

U Software Systems Pvt. Ltd — Chennai, India

- Architected enterprise-level solutions using Symfony 3.x and Laravel.
- Implemented CI/CD pipelines that measurably improved deployment efficiency.
- Led cloud migration work and enforced modern coding standards across teams.
- Mentored developers and ran technical reviews as the team scaled.

Senior Technical Architect *Nov 2015 – Jul 2017*
Expian Technologies Pvt. Ltd — Bangalore, India

- Designed large-scale web solutions on Symfony and Laravel.
- Implemented microservice architectures and REST APIs for distributed systems.
- Set the architecture direction for multi-team product work.

Senior Symfony Developer *Sep 2011 – Sep 2015*
Como Technology Solutions Pvt. Ltd — Chennai, India

- Developed complex enterprise applications using Symfony 2.x, Doctrine ORM and MySQL.
- Integrated Mailchimp, Twilio, SendGrid and multiple payment gateways.
- Delivered tourism, job portal and consumer platforms for international clients.

Senior Software Engineer *Mar 2010 – Sep 2011*
Arokia IT Pvt. Ltd — Bangalore, India

- Developed and maintained PHP-based applications with strong front-end integration.

Software Engineer *Nov 2008 – Mar 2010*
Micro Village Softech Pvt. Ltd — Bangalore, India

- Built and maintained business applications using PHP and MySQL.

KEY PROJECTS

Fintua — Vault & Recover
VAT return platform with Analytics, Compliance and Document Tracker built in. Clients file VAT bills and receive returns based on the bills uploaded, with transaction-level rule checks on every return and full traceability on documents sent.
Stack: Laravel, PHP 8, MSSQL, PostgreSQL, Angular, AWS

S/P2 Careers
US-based job portal with candidate, company and instructor roles. Companies search resumes and hire; candidates search and apply, with Solr powering the search layer.
Stack: LAMP, Symfony 3.4, Solr, Doctrine ORM, MySQL, Redis

Rewards
Gaming giveaway platform that reached 2 million unique views following its January 2016 launch, built to stay responsive under spiky, campaign-driven traffic.
Stack: LAMP, Symfony 2.7, Vue.js, Doctrine ORM, MySQL, Redis

VisitCanberra
Official tourism website for Canberra, Australia, offering accommodation booking through a BOOKEASY API integration alongside editorial features such as Inspire Me and What's On.
Stack: LAMP, Symfony 2.3, AngularJS, Doctrine ORM

TPSE — Tourism Platform
Platform for building tourism applications from 20+ pre-defined CMS block bundles with its own bundle versioning system. Any block can be overridden as a separate bundle to expose additional settings, all configurable by administrators from the CMS.
Stack: LAMP, Symfony 2.6, Doctrine ORM, AngularJS, REST web services

EDUCATION & CERTIFICATIONS

B.E. Computer Science and Engineering — Anna University, Madurai · 73.16% *2007*

MBA (Systems) — Correspondence

Certifications & tools: Jira · Docker · AWS · Solr Search · PHPUnit · Agile/Scrum methodology · Payment gateways · Mailchimp · SendGrid · Twilio · SSO integrations
